## Project experience

Mar 2018 - Jan 2019

Computer instructor

Worked part-time as a teacher of the junior computer course at Beijing Sanfan Secondary School. Students taught won prizes in subsequent stem design competitions.

Mar 2018 - May 2019

Study on the construction of an early warning platform

Team Member

The subject of the National Science and Technology Programme for Rural Areas in the 12th Five-Year Plan. Responsible for the production of the early warning questionnaire, cooperated in collecting public data through the field and the Internet, and independently processed the acquired data for data analysis and visualisation of the results. The data greatly support the need to update the early warning mechanism.

## Skills

**Language proficiency:** IELTS 6.5, experience of working and communicating with foreign students, and proficiency in English communication and essay writing.

**Data analysis and visual expression:** Familiar with Excel and SPSS for data analysis, and able to use PPT for visual expression.
